

One meal a day: a world of difference

In Tamatave, Madagascar, there is a primary school for 270 children from the surrounding area. For many of them, this is their only opportunity to receive an education. There is no other school available.

After the devastating cyclone, almost everything was lost. The roofs of the classrooms were blown away, the vegetable garden was destroyed, and all the chickens that provided food died. Besides that, the sponsor who paid for the daily meals has now also stopped supporting the project. For many children, that meal is the only one they receive each day. Without food, they cannot learn. Without school, they risk falling back into poverty.

HiKidz wants to help these children. For \$3.000 per year, we can provide all 270 children with a warm lunch every day, enabling them to continue attending school and maintain hope for a better future. In addition, we want to help restore the school buildings and the vegetable garden.

Would you like to help? Every donation makes an immediate difference: a meal, a school day, and renewed hope for a child.

To donate, simply scan the QR code or visit our website.
